LOVE SWIFT

UNDER OUR OWN BLUE SKY

Take me to a place that I call Here,
Hold me in a time that I call This
The air is clean, the light is clear
And now an outdoor kind of bliss
Draws me to a spot I really love;
The door wide open, the kettle on,
A family that fits me like a glove.

A moment's pause for those who've gone
Who still remain in the mind and heart.

And now, under our very own blue sky
The rest of our lives can slowly start
And our spirits can begin to fly
With memories of where we've been,
Those mornings we have yet to know
Those brand new vistas all unseen.
Love life, I say. And now, let's go!

SMART CONSTRUCTION

SMART is the basis of our intelligent construction system, used across our entire touring caravan range. Strong, Modern, Aerodynamic, Resilient and Tested, you can be assured your Swift caravan is a high quality engineered product.

STRONG

The Strong timberless body frame uses PURE, a tough, hard polyurethane based product that is totally impervious to water and has been proven through use.

MODERN

The SMART construction system uses Modern materials, and has been developed to ensure the exterior profiles maintain the Modern, desirable looks our caravans are renowned for.

AERODYNAMIC

We continue to lead the way in Aerodynamics, using Computational Fluid Dynamics to help shape the bodyshell for better fuel consumption and safer towing.

RESILIENT

All fixings are made into the PURE material to a pre-defined depth. PURE is totally impervious to water and has no veins. This means there is no passage for water from the outer skin, making the caravan highly Resilient against moisture.

TESTED

Extensive safety Testing at the Millbrook track, plus cold chamber Testing down to minus 15°C and beyond, puts prototypes through conditions most products will never have to experience in a lifetime; all part of the Swift ethos to deliver the best products to you.

HAIL RESISTANT GRP ROOF

Woven GRP outer surface provides greater durability from the elements.

GRP SIDEWALLS

Balanced panel side walls with GRP outer and inner skins. GRP is more impact resistant than aluminium and can be easily repaired, ensuring long lasting good looks and helping protect your investment for the future.

'SMART' GRP sidewall during the production process.

FLOOR CONSTRUCTION

'Sandwich' floor construction with ply upper, high rigidity Styrofoam core and GRP outer skin to provide greater durability from the elements.

MASSSES: The masses are calculated in accordance with EU regulation 1230 / 2012 and NCC code of practice 304.

The Mass in Running Order (MRO) comprises:

1. The mass of the empty caravan as supplied by Swift including loose items such as the hook-up cable, kit bag, entrance step, manuals etc.
2. 10kg allowance for LPG

The MRO is calculated with the fresh water tank, toilet flush tank and water heater empty. If you travel with water in the fresh water tank, toilet flush tank and the water heater the payload will reduce accordingly.

The personal effects is based on the number of berths and the length of the caravan, and includes an allowance of 20kg for a leisure battery.

The Maximum Technical Laden Mass (MTPLM) is the maximum mass allowed when the caravan is fully laden.

WARNING: Under no circumstances should the MTPLM be exceeded.

BED SIZES: Please note that the front double bed sizes quoted are for seating configurations without chest of drawers. The front double bed width for a layout with a chest of drawers fitted will be reduced by 0.4m (1'4") from that stated.

AWNING SIZES: Due to the varying awning designs and sizes the awning sizes given are approximate only. Specific awning sizes must be confirmed by your dealer or the awning manufacturer prior to purchase.

The dimensions given are approximate due to slight variations in suspension ride heights, loading conditions and tyre pressures. Customers should verify the actual dimensions of their touring caravan before committing to anything that could be impacted by these dimensions.

Please note: Any dealer fit options will reduce the overall payload available to the user of the caravan. If you require additional payload it is possible to

upgrade the MTPLM to the upper limit. Please contact your caravan dealer for more information.

LED ROAD LIGHTS: Certain vehicles may require a secondary fuse box when towing models fitted with LED road lighting.
