HEADBOARD

SMART is the basis of our intelligent construction system, used across our entire motorhome range. Strong, Modern, Aerodynamic, Resilient and Tested, you can be assured your Swift caravan is a high quality engineered product.

STRONG

The Strong timberless body frame uses 'PURE', a tough, hard polyurethane based product that is totally impervious to water and has been proven through use.

MODERN

The SMART construction system uses Modern materials and has been developed to ensure the exterior profiles maintain the Modern desirable looks our motorhomes are renowned for.

AERODYNAMIC

We continue to lead the way in Aerodynamics using Computational Fluid Dynamics to help shape the bodyshell for better fuel consumption.

RESILIENT

All fixings are made into the 'PURE' material to a pre-defined depth. 'PURE' is totally impervious to water and has no veins. This means there is no passage for water from the outer skin, making the motorhome highly Resilient to moisture.

TESTED

Extensive safety and durability Testing at the Millbrook track, and cold chamber Testing down to minus 15°C and beyond, puts prototypes through conditions most products will never have to experience in a lifetime; all part of the Swift ethos to deliver the best products.

HAIL RESISTANT GRP ROOF

Woven GRP outer surface provides greater durability from the elements.

GRP SIDEWALLS

Balanced panel side walls with GRP outer and inner skins. GRP is more impact resistant than aluminium and can be easily repaired, ensuring long lasting good looks and helping protect your investment for the future.

FLOOR CONSTRUCTION

'Sandwich' floor construction with ply upper, high rigidity Styrofoam core and GRP outer skin to provide greater durability from the elements.
